PROFESSIONAL SUMMARY

Computer Science Engineering graduate and IT professional transitioning into networking, with 3+ years of software development experience. Completed A+, Network+, CCNA, and CEH training at Indra Institute of Education (IIE). Skilled in networking fundamentals, TCP/IP, subnetting, routing, switching, VLANs, troubleshooting, Linux, virtualization, and network infrastructure. Seeking an entry-level Network Engineer, NOC Engineer, or Network Support role.

WORK EXPERIENCE

Indra Institute of Education, Intern Gained hands-on experience in networking, Linux, network troubleshooting, routing, switching, VLANs, and network security using Cisco Packet Tracer and Wireshark.	09/2026 – 10/2026 Coimbatore
Trika Technologies, Full Stack Developer Developed and maintained enterprise applications and middleware platforms in a production environment. Worked with Linux, APIs, cloud services, monitoring, and distributed application infrastructure. Used Grafana for service monitoring and troubleshooting. Collaborated with teams to troubleshoot application, integration, and infrastructure-related issues.	04/2023 – 02/2026 Coimbatore
Zoho Corporation, Software Developer Intern Developed backend log-management systems using Java, MySQL, and JDBC. Worked on data retrieval, querying, sorting, and troubleshooting. Gained practical experience in software development and debugging.	09/2022 – 02/2023 Chennai

EDUCATION

Bachelor of Engineering in Computer Science and Engineering, <i>Dr. N.G.P. Institute of Technology</i> CGPA: 7.71	2019 – 2023 Coimbatore
A+, N+, CCNA, CEH, Indra Institute of Education	06/2026 – 09/2026 Coimbatore

TECHNICAL SKILLS

Networking: TCP/IP, OSI Model, IPv4, IPv6, Subnetting, VLANs, Trunking, STP/RSTP, Routing, OSPF, DHCP, DNS, NAT, ACLs, VPN Fundamentals, SSH | **Network Infrastructure:** Routers, Switches, Wireless Access Points, Ethernet, LAN, Network Topologies, Network Troubleshooting | **Systems & Infrastructure:** Linux, Windows, Proxmox, Virtualization, Docker, NFS, SMB/Samba | **Monitoring & Remote Access:** Grafana, Uptime Kuma, Twingate, Tailscale, Cloudflare Tunnel | **Networking Tools:** Cisco Packet Tracer, Wireshark | **Programming & Scripting:** JavaScript, TypeScript, Java, SQL | **Development Tools:** Git, GitHub, VS Code | **AI Tools:** ChatGPT, GitHub Copilot

CERTIFICATIONS

A+: Indra Institute of Education (IIE) | **Network+:** Indra Institute of Education (IIE) | **CCNA:** Indra Institute of Education (IIE) | **CEH:** Indra Institute of Education (IIE) | **Certified Java Developer:** Infosys Certification, 2022 | **Advanced Programming Training:** Zoho Corporation

NETWORKING TRAINING

Networking & Cybersecurity Training, *Indra Institute of Education (IIE)*

29/06/2026 – 23/09/2026

Networking Fundamentals OSI Model and TCP/IP Model IPv4 and IPv6 Addressing
Subnetting Ethernet and Networking Media LAN and Network Topologies Routers and
Switches VLANs and Trunking STP / RSTP Static and Dynamic Routing OSPF DHCP DNS
NAT ACLs VPN Fundamentals SSH Network Troubleshooting Basic Network Security
Cybersecurity and Ethical Hacking Fundamentals

NETWORKING LABS & PROJECTS

Cisco Networking Lab — Packet Tracer

Designed and configured multi-router network topologies using Cisco Packet Tracer. Configured VLANs and inter-VLAN routing for network segmentation. Configured OSPF for dynamic routing between routers. Implemented DHCP for automated IP address allocation. Practiced ACL configuration for traffic filtering and access control. Practiced STP/RSTP and LACP/EtherChannel concepts. Performed network connectivity testing and troubleshooting.

Home Lab — Network & Infrastructure

Built and maintained a virtualized home-lab environment using Proxmox. Managed virtual machines and self-hosted infrastructure services. Configured NFS and SMB/Samba network storage. Implemented remote access using Twingate and Tailscale. Used Cloudflare Tunnel for secure remote access. Configured DNS services and Pi-hole. Implemented infrastructure monitoring using Grafana and Uptime Kuma. Troubleshot network connectivity, DNS, service access, storage, and infrastructure issues.
